ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD FOR LOADING AMPHIPHILE PARTICLES WITH ACTIVE AGENTS

(57) Abstract: The present invention provides a method for the production of amphiphile particles having incorporated therein at least one active agent. The method comprises forming a dispersion of particles comprising at least one amphiphilic structuring agent in a solution of at least one active agent, heating said dispersion to an elevated temperature, followed by cooling to around ambient temperature. The loading provided thereby is typically at least 130 % of the loading provided by equilibration of the particles in a solution of active agent. The invention also provides corresponding amphiphile particles.
